

Problems with **Mold, Mildew, & Moisture** under your mattresses

At FinestBedLinen.com we not only offer a wide range of bed linens we also supply standard & bespoke mattresses. We can even prolong the life of an existing mattress with our breathable airflow mat

Breathable Airflow Mat

A new type of matting designed to combat the build up of mold, mildew & moisture by compressing & releasing air under mattresses & cushions as you move.

Air is compressed & released through the mat

- Reduces moisture build up
- Inhibits bacteria - MRSA, E-coli, Salmonella
- Flame retardant
- Machine Washable

Trapped moist air between mattresses & solid or slatted bases causes mold & mildew especially in bunks over air conditioning units. This ruins mattresses & can affect your health.

Finest Bed Linen supply these mats, cut to size & ready to go or built into a new mattress.
