RUDI:
Who, What, Where, When,
Why and How?

In 1996, **Rudi Rabitti** trademarked in Milan **Tecnocuoio®**, a composite material, both **UV-resistant** and **water-resistant**, made from leather castoffs from its own production.

The company was well ahead of its time in adhering to a **zero-waste philosophy** that was both **eco-friendly** and **functional**.

While the company has focused on contract work, the acquisition of the brand in 2017 by Giobagnara resulted in the decision to create two separate brands: Rabitti 1969 for products made from genuine leather; and **RUDI** for items created from regenerated leather.

Giobagnara sees an opportunity to introduce **RUDI** products to a wider audience. With the creative direction of the Italian designer **Simone Fanciullacci**, since 2019, the company is pursuing a more decorative approach, able to explore new languages and enhance the properties of **Tecnocuoio®**. It is enlarging the number of product categories and expanding the number of aesthetic solutions for **interior design projects**, **high-end Ho.Re.Ca** and the **yacht interiors** market.

The objective of **RUDI** is to eliminate all leather waste and create beautiful objects from recycled materials that are perfect both for **indoors** and **outdoors**, able to generate an elegant yet casual atmosphere where simple lines play with complex patterns, looking for practical yet always original solutions.

RUDI can now be viewed as more than just a brand name. It is a **model of Italian ingenuity** where Giobagnara has brought together all of its know-how and creativity in an effort to raise ecological awareness.

A HANDMADE TRADITION

RUDI creations are **made entirely by hand** with the masterly skills of our craftsmen who, thanks to their experience, take care of everything down to the smallest detail to guarantee **durable** and **impeccable products**, all in accordance with the original tradition of Italian finest handmade leather goods combined with the use of cut-edge technology.

www.home-yacht.com

TECNOCUOIO®

Trademarked by the company in 1996, this innovative material is composed of **finely milled leather castoffs** tanned with vegetal extracts, natural latex (extract from the rubber tree) for bonding, natural fats, salts and natural coloring agents. After adding water, the mixture is pumped through a screen. After being dried, pressed and refined, one obtains a bonded leather fiber material via a process similar to that used in the production of paper. The result is a **high-quality regenerated leather** boasting elasticity that is both **UV-resistant** and **water-resistant**, and which features a perfectly smooth surface.

SIMONE FANCIULLACCI CREATIVE DIRECTOR OF RUDI

Simone Fanciullacci, born in 1982 in Genoa, Italy, graduated from Milan Polytechnic in 2008. After having perfected and enriched his own design practice with several experiences, both in the field of furniture design and in that of jewelry, he founded his own studio based in Milan in 2010.

The studio was immediately conceived as the concretization of a mental space, an atelier in which different souls in apparent contradiction can emerge in search of a balance, of a creative tension.

A laboratory in which to experiment with different materials and processes, combining intellectual theorizing and artistic research to transform them into matter, immersed in an atmosphere of organized chaos. This is how countless projects were born both for companies and for galleries, some designed for large-scale distribution, others conceived as unique pieces, projects that face complexity without shortcuts, always looking for a new perspective and new expressive languages.

Since 2019, Simone Fanciullacci has been entrusted with the creative direction of RABITTI1969 by GIOBAGNARA and RUDI by GIOBAGNARA, for which he designed a wide number of collections imbued with his sense of unrestrained creativity with an elegant yet playful twist.

VIENNA
BASKETS

The traditional Vienna weaving style becomes a graphic sign through the raw-cut Tecnocuoio®. A classical language is thus reinterpreted with an ironic and contemporary spin. Available in 16 sizes, these baskets can be equipped with a lid and/or a fine linen bag. Finest regenerated reinforced leather structure with water-resistant and UV-resistant finish. Ideal for laundry, towels, magazines or everyday objects. Fit for both indoor and outdoor use. Non-slip waterproof rubber base underneath.

It is possible to choose any color combination from our chart for the baskets' bicolor version.

Design by Simone Fanciullacci.

Please follow the color scheme below when placing the order.

CANCUN
BASKETS

The Cancun baskets are characterized by a weave that develops only through vertical dotted lines that, being cut diagonally, seem to chase one another on the surface, giving life to a design that reminds of the warm and a tad retro atmospheres of certain fabrics typical of Central America.

Finest regenerated reinforced leather structure with water-resistant and UV-resistant finish.
Ideal for laundry, towels, magazines or everyday objects.
Fit for both indoor and outdoor use.
Non-slip waterproof rubber base underneath.

It is possible to choose any color combination from our chart for the baskets' bicolor and tricolor versions.

Design by Simone Fanciullacci.

LISBONA
BASKETS

The Lisbona baskets' design comes from the variation of a classic weave with vertical and horizontal bands in which, however, the overlays are hidden so as to create a surface similar to a mosaic.

The surface that acts as a frame for the bands acquires importance and, from simple background, it becomes a decorative element able to enhance the weave and its design.

Finest regenerated reinforced leather structure with water-resistant and UV-resistant finish.

Ideal for laundry, towels, magazines or everyday objects.

Fit for both indoor and outdoor use.

Non-slip waterproof rubber base underneath.

It is possible to choose any color combination from our chart for the baskets' bicolor and tricolor versions.

Design by Simone Fanciullacci.

Please follow the color scheme below when placing the order.

NASSA
TRAYS
ROUND

The Nassa collection is the perfect synergy of style and utility able to redefine living spaces with its sophisticated allure. The framework of these trays boasts a sophisticated dark-stained aluminum structure and a vibrant Tecnocuoio® weaving, providing not only durability but also a touch of contemporary elegance. This sleek combination of materials ensures sturdiness while adding a subtle yet striking visual appeal to the trays.

Design by Simone Fanciullacci.

GOURDE
CARAFES

Gourde is an exquisite set of carafes, where cutting-edge design meets sustainable luxury. The carafes feature a two-chamber insulated stainless steel structure with chrome-plated finish which is able to maintain the liquid's optimal temperature for extended periods. The stainless steel structure is partially dressed with an exquisite woven finest regenerated leather cover, which is also removable to ensure an easy cleaning. Precise pouring is ensured thanks to the specially developed hinged lid with one-hand operation.

GIOBAGNARA introduces a new collaboration with the internationally renowned designer Adam D. Tihany, who conceived a striking collection called "TOUR" for RUDI.

ADAM D. TIHANY
×
GIOBAGNARA

Since all RUDI's products employ Tecnocuoio®, a trademarked innovative, incredibly durable and functional material due to its unparalleled water-resistance and UV-resistance properties, they are the perfect solution for environments that require an intensive use and frequent washing.

Here the TOUR collection, which has been designed for the luxury interior field - be it private residences, high-end hotels, yachts or jets - finds its ideal space.

www.home-yacht.com

ADAM D. TIHANY

Based in New York, Rome and Paris, Designer Adam D. Tihany brings 40 plus years of expertise in International Luxury Hospitality and Residential design, from Restaurants to Hotels and Cruise ship to high-end products. The Beverly Hills Hotel, The Breakers and the Oberoi Delhi, numerous hotels for Mandarin Oriental and The Four Seasons are some of the iconic hotels in his portfolio. Thomas Keller, Daniel Boulud and Heston Blumenthal are among the many celebrity chefs from whom Tihany created flagships world round.

Since the onset of his career, Tihany has been committed to creative excellence, innovation and timeless elegance.

Under the Tihany Product Design label, he creates sophisticated and elegant products for world renown manufacturers.

TOUR COLLECTION

Direct and purposeful, with sophisticated simplicity, the TOUR collection features shapes born from the interaction between the concepts of geometry and sinuosity.

The designer's fascination with the simple action of bending, curving and layering materials in order to create new forms is the driving force behind the design.

A bend around the corner - a "TOUR" - is all it takes to start this journey, where creativity paves the way to infinite possibilities and experimentations.

TOUR
DESK SET

Direct and purposeful, with sophisticated simplicity, the TOUR collection features shapes born from the interaction between the concepts of geometry and sinuosity. The designer's fascination with the simple action of bending, curving and layering materials in order to create new forms is the driving force behind the design.

A bend around the corner - a "TOUR" - is all it takes to start this journey, where creativity paves the way to infinite possibilities and experimentations.

CUSTOMIZATION

It is possible to provide products with an even more exclusive feeling requesting a debossed customization. Choose the stamps' sizes and to either apply or not a foil. Debossing foils feature a wide number of colors; the selection plays on endless associations and includes metallic finishes.

TECNOCUOIO®

Trademarked by the company in 1996, this innovative material is composed of 65% genuine leather castoffs tanned with vegetal extracts, 18% natural latex (extract from the rubber tree), 10% water, 5% natural fats and 2% natural coloring agents and salts. Rudi utilizes a production technique that adheres to a zero-waste philosophy that is eco-friendly and functional. The result is a high quality regenerated leather boasting elasticity that is both UV-resistant and water-resistant and which features a perfectly smooth surface.
